Stockholm, Sweden

Skills

CAD
Solid Edge, Siemens NX

Analysis
Basic FEA, mechanics and statics, load calculations, force analysis

Workshop
Milling, turning, waterjet cutting, welding, assembly

Other
Technical design, project management and communication, car repair

Languages

Swedish	Fluent
English	Fluent
Spanish	Basic

Driving licence

AM and B

Sport and leadership

Sollentuna FK
Played semi-professional football

Rotebro IS
Was a volunteer coach for P08 and a leader at Football Summer Camp

Triathlon Sverige
Event official

Profile

I'm studying for an MSc in Vehicle Engineering at KTH, heading for the Road Vehicles track, and design suspension parts for KTH Formula Student, drawing them in CAD and then building them in the workshop. Alongside my studies I've run Bajras Barbershop since 2021 and have played semi-professional football for Sollentuna FK. Coaching and running my own business have taught me to take responsibility and get a group to perform together.

Experience

KTH Formula Student

Jan 2025–present

Mechanical Design Engineer, suspension

- Designed bellcranks in Solid Edge and NX, sizing them with load calculations, force analysis and basic FEA.
- Designed the control-arm inserts and adapted geometry and fits for manufacturing and assembly.
- Made parts on the mill and lathe, assembled the suspension and took part in testing and racing at Formula Student Switzerland 2026.

Bajras Barbershop

2021–present

Founder and barber

- Run my own barber business alongside school and university, responsible for clients, scheduling and quality.
- Cut the team's hair in the social area at FSCH 2026, earning KTH Formula Student the Master of Sidequesting award.

Earlier jobs

- **Hertz Sverige**, car rental, car care and customer service
- **McDonald's**, cook and crew member
- **Mleva Solutions**, disassembly and assembly of electronic equipment
- **Orbotech**, internship, repair and maintenance of cleaning machines
- **Tutoring**, maths, science and Spanish

Projects

Rusted exhaust manifold repair, Jun 2026
The flange at the cylinder head had rusted through and was leaking exhaust. Drew a new flange, cut it out on the waterjet and fitted it to the manifold so it could be reused.

Cars in my free time
Repair and tune cars, including engine work on an Audi TT 1.8T, welding a complete new exhaust system after the pipe snapped, a brake hose repair and remounting tyres.

Education

KTH 2024–2029
MSc Vehicle Engineering, Road Vehicles track

Rudbecks gymnasium
Natural Science programme, plus Programming 1, Mathematics 5, English 7 and Spanish 4
